

VELVET w1

Designed by Ronni Gol

DESCRIPTION

Decadence, mounted with intention. VELVET W brings the family's signature cylinder to the wall - its finely grooved, velvety surface a tactile whisper of another era, rendered with unmistakably contemporary precision. Twin spotlights at each end cast long, defined cones upward and downward, tracing the full height of a room and lending drama to generous ceiling heights.

Four sets of interchangeable end caps offer four distinct expressions from a single fixture - personalization as effortless as it is refined. Available in black, rose gold, brass, and titanium.

Switch Tune selects between 2700K and 3000K at installation. Architecture for the wall. Unmistakably VELVET.
